Enhance the elegance and comfort of

## YOUR PLACE IN THE SUN

Your home is the primary expression of the elegance, grace and beauty that defines your world. Indoors or out, your place in the sun means comfort and protection to family and friends.

the most popular brands of woven acrylics, in solids or stripe patterns, and vinyl coated mesh in solids. All are resistant to water and mildew and will hold their colors for many years.

Your Solair awning can be mounted anywhere—on a roof, wall or ceiling.

Comfort outdoors—on the deck or patio—means you can bask in the sun or enjoy the cool shade whenever you wish.

Working on the deck or patio with your laptop, entertaining friends, or just kicking back, a Solair Lateral Arm

Retractable Awning from Astrup gives you ultimate control of outdoor comfort.

With just an easy turn of a crank, or the push of a button you control how much sun or shade is

just right. You can even program your Solair awning to automatically extend or retract according to wind or sun conditions.

When extended, it complements the appeal of your home, whatever its décor or architectural style.

When retracted into its protective hood, it is tastefully unobtrusive.

Not only does your Solair awning enhance your fun in the sun, or shade, but it also

protects indoor furnishings from

damaging UV exposure. All this and your utility bills will go down, too.

Year after year, in all kinds of weather, Solair awnings continue to look bright and new.

Manufactured with materials and components of the highest quality, your Solair awning will stand up to the severest environmental conditions with just a minimum of maintenance. When self-contained by its protective hood, your awning is completely shielded from the weather and there is no need to remove it regardless of the season.

And, when the wind really kicks up, you can add strength and stability to any Solair awning with the optional, easy-to-install Solair Outrigger System.

Solair awning systems carry the internationally recognized TUV certification signifying their quality, durability and workmanship.

For more than 131 years, the name Astrup has been synonymous with the ultimate in quality and craftsmanship.

Your place in the sun deserves nothing less.

A Solair awning is an investment in the beauty and value of your home. Choose from

**OVER 131  
YEARS OF  
LEADERSHIP  
AND  
INNOVATION**

Established in 1876, The Astrup Company has earned the reputation as a global leader and innovator in the fabric and marine industries. Astrup offers a comprehensive and complete line of fabrics, hardware, finishing tools, trimmings and cordage that are internationally distributed.

You can count on Astrup for quality products and commitment to customer satisfaction.

**SOLAIR MEANS SATISFACTION**

Quality, ease of operation and lasting beauty—this is yours with a Solair retractable awning.

Choose from hundreds of different solid or stripe fabrics to complement your home's unique décor. Available in a variety of colors—from soft pastels and earth tones to vivid primaries—each of these woven acrylic and coated mesh fabrics is resistant to water and mildew and will look bright and new for years, in any climate.

In addition to Solair's four standard frame colors, you can choose from a variety of custom frame colors to match your special needs.

Standard frame colors include:

- Desert Sand (Ivory)
- Brown
- White
- Mocha

Solair retractable awnings are designed to be as functional as they are attractive—no support braces to set up and walk around. For high strength and long life, all critical parts are forged aluminum, rather than cast. Electrostatic powder coating of all aluminum frame components provides a long, corrosion-resistant life.

Installation is fast and easy to any mounting surface—a wall, ceiling or roof.

High-strength, extruded aluminum mounting brackets—much stronger than cast hinges—and corrosion-resistant fasteners ensure a secure installation that will withstand the severest wind and weather conditions.

Authorized Solair Dealer

Solair® is a registered trademark of The Astrup Company.

WHEN YOU WANT THE VERY BEST

Robust forged parts offer superior strength and durability.

Aluminum construction for strength and quiet operation. The hood provides long lasting protection to the fabric against wind and sun damage.

Easily convert manual gear-driven units to motorized units.

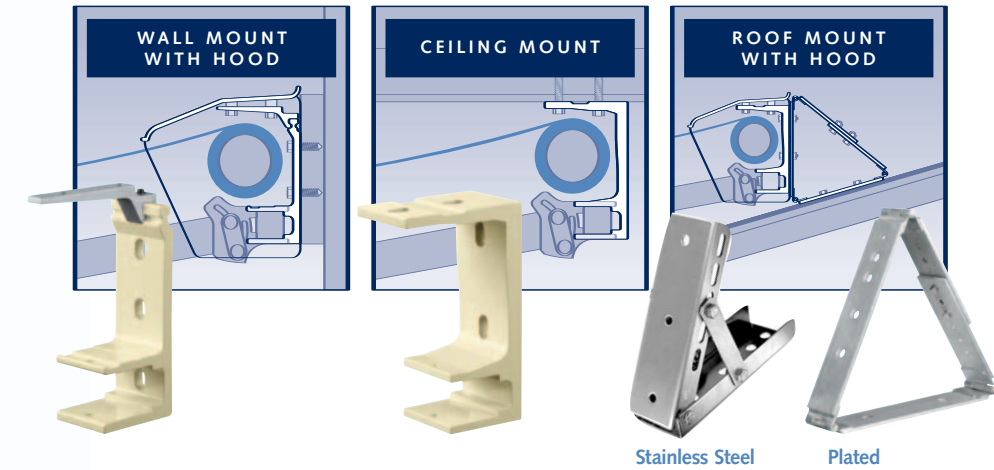

Available in sizes from 6 ft to 35 ft wide, with seven folding arm projection sizes, from 4'2" to 12'6", and with simplified pitch adjustment from 5° to 45°.

Clean design with no support braces or posts to set up.

MOUNTING OPTIONS

Your Solair retractable awning can be mounted quickly and easily to brick or block, siding, or wood frame materials of a new or existing structure.

Special brackets accommodate a wall, ceiling, or roof mount installation.

CONTROL OPTIONS

Automatically control your Solair awning with WireFree™ RTS Sensors and RTS motors from SOMFY – the world's largest manufacturer of specialized tubular motors, controls and sensors. Whether you are home or away, your Solair awning can be programmed to respond to wind and sun conditions.

Safe, reliable operation assured by award of TUV Certification—an international product safety and quality assurance testing company.

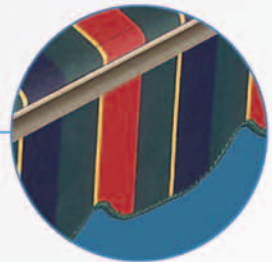

Twin cable, forged hinges with permanently sealed needle bearings absorb stresses from wind gusts.

Two-way, moveable front bar fitting increases flexibility to relieve strain on awning from wind gusts.

Your choice of hundreds of acrylic and coated mesh fabrics: lightweight, strong, and resistant to water, mildew and UV damage.

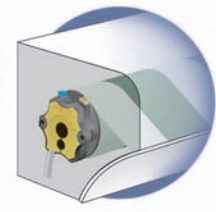

You can choose from several valance styles, plus braid or binding finishes in a wide selection of coordinating colors.

The Sunis WireFree™ Sun Sensor is a wireless, sun sensor that is powered with an integrated solar cell and uses RTS to automatically extend an awning based on the sun's intensity.

The Eolis WireFree™ RTS Wind Sensor is a wireless, battery powered wind sensor that will automatically retract the awning when it detects the awning moving from wind or vibrations.

Fully contained within the roller tube of your awning, the electric motor provides a clean, concealed installation that blends into the lines of your home.

Hand-held transmitter (up to 65 foot range) gives you complete control of your awning. A powerful tubular-motor device will retract or extend your awning whenever you wish.

WARRANTY

Astrup Solair retractable awning framework is covered by a 10-year warranty; standard awning fabrics are covered by a 5-year warranty and Somfy Motors are covered by a 5-year limited warranty from date of original purchase.

Contact your local Solair dealer for additional information and warranty details.
