

This open roller drop arm window awning has a wider width size range up to 40'. With additional arm placements for support, the unit can cover wider window areas where attachment is possible for maximizing solar protection. The spring loaded arm tension guarantees a taut fabric cover that can be dropped to a 160 degree position just short of a totally vertical application while allowing some light to still transmit in from the open sides of the awning. An optional hood with side covers is available for top protection on the open fabric roller for a beautiful finished appearance.
